Subject: Draft Amendment to ESF 10 -- sams feedback
Signed By: michael.k.sams@uscg.mil

Makes sense to me. I'm not sure we should list CDR Hutley as action officer though...wouldn't that be you, Captain? Now would be a great time to determine exactly when the state cost share adjusts from zero to 10%. As currently written, there might be a gap (current MA ends on 21 Sep; cost share doesn't begin until 23 Sep...).

Bottom line, we might have to push through two of these. One now to take us to the end of zero cost share; another on the date the 10% cost share begins. I wouldn't think that TGLO would have to wait until "the actual date" to sign -- just revise to reflect effective date, with 10% cost share, and the projected end date.

V/r,

Mike Sams

So after talking to some more experts, we should advise the State they will need to sign this after 9/21/17 so this would include the 90/10 cost share. It appears that if we submit this now we will need to submit another one after the 100% cost share expires, so the advice is to give to the state so they are prepared, but no need to submit until after 9/21/17. The attached is a revised copy to make it clearer. Thoughts? Steve?

Mike I am being told from FEMA that the correct way to do this is to amend the original RRF, which took some doing to amend a photocopied piece of paper, but ingenuity paid off. Please look over the draft amendment I have

constructed, I also have FEMA and EPA reviewing it prior to me handing it over to the State for their imminent signature. I have also included the MA that is current with the IFMIS stamp as well as the original RRF that was submitted. I touched base with Tedd Hutley and let him know what was tentatively happening and I put his name as the OFA Action Officer.
